Table of Contents

1 ADD: Purpose and scope

This document describes the improvements and changes of the current ADD version compared to the previous versions.

2 ADD - What's new in 22.2.R0

2.1 New Features, Major Improvements

Key	What's New
ADDS-20698	**ADD PACES Connection** Tool specific blocking of PACES connections by administrator added.
ADDS-20638	**SWC Interfaces** Issues in the usability of the SWC interfaces have been fixed.
ADDS-20543	**VVS CodingNumber Sort** Consider CodingNumber (Accending) of VariantCoding Selectors when generating Virtual Variant Selectors (VVS) in ADD.
ADDS-20391	**Lock Recursive Fix** Allow the usage of "Apply All" functionality in order to Lock elements automatically when using ADD feature "Recursive Fix".
ADDS-20389	**DB Collaboration Lics** Allow the use of separate user-specific application licenses on collaboratively shared ADD databases.
ADDS-20376	**Redundant Error MessageBoxes** Issues related to the pop-up of redundant Message-Box windows in case of errors within ADD Autosar functions fixed.
ADDS-20062	**Removed Supplier Interface** List removed Project Supplier Interface elements; mark elements as "Modified" and strike-through text formatting.
ADDS-20060	**Prj Verified Frozen Check** Force the specification of a description in case a Project Frozen Check has been marked as "Verified"; allow the listing of "Verified" elements within the "Lib-Freeze Check Results" window.
ADDS-20058	**Enlarge Prj Remark** Maximum number of characters of Project Remark attribute increased to 4000.
ADDS-20056	**Based On Project** Introducing new Project attribute "Based on Prj"; containing the information of the base Project used for coping or versioning.

ADDS-19197	**Prj Function Reliability**
	Introducing new Project and CsAdp Feature "Function Reliability"; new Attribut added to CustomTag "CsAdp"; Attribut "FunctionReliability" will be considered within Project Checks.
ADDS-18858	**NCheck Current Selection**
	Always show currently selected Catalog element within the NCheck Catalog Dropdown dialog.

2.2 Minor Improvements, Correction of Bugs

Key	What's New
ADDS-20779	**Change Conversion Version**
	Issues related to non-changeable Conversion Version for a given DataObject in case of deactivated SW DataType section fixed.
ADDS-20743	**Export DDX**
	Bugfix: the DDX export generated a different DDX format than ADD offline required.
ADDS-20739	**SQLServer CV CMP Delete**
	Issues related to error when deleting Compositions containing CodeVariant references on an ADD MS SQLServer database fixed.
ADDS-20624	**Scalar Map-Template**
	Allow also the usage of "scalar" - Templates for DataObjects of Type "Map".
ADDS-20600	**STD Axis Online-Ref Version Reset**
	Issues related to the erroneous reset of Axis - Online References after creating a new Map Version fixed.
ADDS-20459	**Data Object Definition**
	Bugfix: If the integration to INPUT and the visible flag of an OUTPUT object were changed and committed at the same time, the change to the visible flag was not saved.
ADDS-20454	**Reload Runnable Change**
	Issues related to a missing Reload MessageBox when changing to another Tab after modifying Container Runnable - Information fixed.
ADDS-20385	**Get All ENUMs**
	Issues related a crash or erroneous return list when using "Get All" with the "Enum Types..."/"Search Enum Types..." Administration window fixed.
ADDS-20368	**ADD MDX Struct Desc/LongName**
	Issues related to a switch of the Description and LongName value within the ADD MDX Export of Structure DataObjects fixed.

ADDS-20355   **SWC check messages**

Bugfix: The SWC check messages were incomplete and different from the PACES UI.

ADDS-20304   **Container Check**

Bugfix: Container check 2 was shown in yellow if it contained only hidden obsolete DOs although it should be green.

ADDS-20207   **Prj CT Rights**

Issues related to the deletion of a CustomTag assigned to a Project without sufficient User Rights fixed.

ADDS-20031   **Prj-Context Cnt-Check**

Issues related to an erroneous Container Check Result when executing the Check within a Project Context fixed.

ADDS-14222   **ADD Create History Snapshot**

Issues related to a missing "Create History Snapshot" - Button in case of active ADD feature "PACES/DB History" fixed.

ADDS-14130   **ADD DS TakeOver Excel Export**

Issues related to the unmarked export of deactivated DataSpace Elements into Excel from within the Project DataSpace TakeOver window fixed.
