# 1 ADD: Purpose and scope

This document describes the improvements and changes of the current ADD version compared to the previous versions.

## 2 ADD - What's new Info

### 2.1 Version 25.1.R0

#### 2.1.1 New Features, Major Improvements

Key	What's New
<a href="#">ADDS-22896</a>	<p><b>ARXML Export</b></p> <p>It is now possible to configure the ARXML export so that invalid format strings are omitted.</p>
<a href="#">ADDS-22596</a>	<p><b>Container Check</b></p> <p>The container references check will now no longer check for equality in the relationships map-axis, axis-online and map-online with regard to the code variants, but will check logically whether a code variant term represents a subset of the second term.</p>
<a href="#">ADDS-22491</a>	<p><b>Search Referencing Objekts</b></p> <p>In Conversion-, EnumType-, FormatString-, Unit- and Struct-Management it is now possible to search for the referencing objects and open them for editing.</p>
<a href="#">ADDS-22489</a>	<p><b>Editing Referenced Objects</b></p> <p>It is now possible to edit conversions, enum types, struct types and units that are in 'draft' status, even if they are referenced. The new behaviour is optional.</p>

#### 2.1.2 Minor Improvements, Correction of Bugs

Key	What's New
<a href="#">ADDS-23314</a>	<p><b>Enum Conversion</b></p> <p>An error has been fixed which meant that limits could no longer be assigned for data objects with Enum conversion.</p>
<a href="#">ADDS-23311</a>	<p><b>String Conversion</b></p> <p>Fixed a bug that caused an inconsistent init value to be set when deleting a string conversion value used as an init value.</p>

Key	What's New
ADDS-23309	<p><b>Enum Conversion</b></p> <p>Fixed a bug that caused ADD to crash under certain circumstances when working with referenced enum conversions.</p>
ADDS-23298	<p><b>Enum Conversion</b></p> <p>An incorrect error message that could occur when working with enum conversions has been corrected.</p>
ADDS-23296	<p><b>String Conversion</b></p> <p>Fixed a bug that caused ADD to crash under certain circumstances when working with referenced string conversions.</p>
ADDS-23269	<p><b>SWSC</b></p> <p>Fixed a bug that caused ADD to crash when replacing an SWSC.</p>
ADDS-23247	<p><b>Composition Check</b></p> <p>A bug has been fixed that caused entries to be missing in Composition Check No. 16 "Container Interface Local Check" under certain conditions.</p>
ADDS-23244	<p><b>Function Package</b></p> <p>Fixed a bug that caused a misleading error message to be displayed when an already referenced Function Package was inserted into a newly created Function Package.</p>
ADDS-23240	<p><b>Project Check</b></p> <p>A bug has been fixed that caused the Project Check No. 16 (Container &amp; Composition Interface Local Check) not to work properly in some constellations.</p>
ADDS-23237	<p><b>VDM</b></p> <p>A bug has been fixed that caused the call of the VDM from an SWC to fail if the call was made together with a code variant configuration.</p>
ADDS-23214	<p><b>DB Connection Error</b></p> <p>A misleading UTC time specification in an error message has been replaced by the local time specification.</p>
ADDS-23167	<p><b>VDM</b></p> <p>A bug has been fixed that under certain circumstances caused the VDM to crash when opened from ADD.</p>
ADDS-23141	<p><b>Super User Mode</b></p> <p>Removed a misleading lock error message that was displayed when a SuperUser wanted to reset the status of a Project or a Conf. Package.</p>

Key	What's New
<a href="#">ADDS-23099</a>	<b>SIM Data Type</b> Fixed a bug that caused the wrong SIM base type to be displayed for old Std-Axes under certain conditions.
