1 ADD: Purpose and scope

This document describes the improvements and changes of the current ADD version compared to the previous versions.

2 ADD - What's new Info

2.1 Version 25.2.R0

2.1.1 New Features, Major Improvements

Key	What's New
-----	------------

No issues found

2.1.2 Minor Improvements, Correction of Bugs

Key	What's New
-----	------------

ADDS-23478	<p>Take Over Functionality</p> <p>An error has been fixed that could cause the limit values to be reset to the default setting after Sync when using the Take Over functionality if no values were set for the Memory Allocation attribute in the DDX file.</p>
------------	--

ADDS-23462	<p>JFXHost</p> <p>Fixed a bug that caused an error message to be displayed when starting ADD if the JfxHost log directory did not exist, although it should be created automatically.</p>
------------	--

ADDS-23454	<p>Create new Data Object (Revision)</p> <p>An error has been fixed that prevented a new revision of a fixed data object from being created under certain conditions.</p>
------------	--

ADDS-23449	<p>Data Space</p> <p>An error has been fixed that could lead to gaps in the positions of duplicates when writing DataSpace entries to the DB.</p>
------------	--

ADDS-23446	<p>Data Object</p> <p>In case of using the SQL server an error has been fixed that caused an exception when trying to update init values after a change of a data object.</p>
------------	--

Key	What's New
ADDS-23419	<p>Data Object - History and Time Stamp Fixed a bug that caused incorrect history entries and LastUpdate time stamps for <i>fixed</i> data objects when the <i>SetSIMDTasSWDT</i> option and multi selection were active and the SIM DataType was changed.</p>
ADDS-23412	<p>Enum Conversion A bug has been fixed that caused error messages not to be displayed if an enum commit failed during a bulk change ('Apply with TakeOver'). In addition, the display in the UI remained in an inconsistent state.</p>
ADDS-23330	<p>Struct Member - Map An error has been fixed which meant that an axis could not be deleted and recreated in a structure member map without executing an apply in between.</p>
ADDS-23328	<p>STD/FIX Axes Fixed a bug that caused the LongName to be set only when creating a STD/FIX axis in ADD and not adjusted when renaming.</p>
ADDS-23261	<p>ADD Offline Sync An error has been fixed that caused an incorrect error message to be displayed when parsing code variants at ADDOffline Sync.</p>
ADDS-23186	<p>ARXML Import Various improvements have been made to the ARXML import in ADD to support the user in his work.</p>

11 issues

3 ADD - What's new Appendix

3.1 No longer supported features

Key	What's New
-----	------------

No issues found
