# 1 ADD: Purpose and scope

This document describes the improvements and changes of the current ADD version compared to the previous versions.

## 2 ADD - What's new Info

### 2.1 Version 26.1.R0

#### 2.1.1 New Features, Major Improvements

Key	What's New
-----	------------

No issues found

#### 2.1.2 Minor Improvements, Correction of Bugs

Key	What's New
-----	------------

**ADDS-23 ARXML Import**  
794 A bug has been fixed that caused too few artefacts (data objects and structure types) to be imported.

**ADDS-23 Database Access**  
769 A bug has been fixed that caused timestamps in synchronised passwords to be affected by the system's local date format settings. Now Timestamps are system-independent.

**ADDS-23 DO LOCAL warning message**  
752 A warning that appears after editing a local data object can now be disabled via settings.

**ADDS-23 VDM**  
728 A bug has been fixed that caused inconsistencies in the database, which in turn caused the VDM to crash.

4 issues

## 3 ADD - What's new Appendix

### 3.1 No longer supported features

Key	What's New
