1 ADD: Purpose and scope

This document describes the improvements and changes of the current ADD version compared to the previous versions.

2 ADD - What's new Info

2.1 Version 23.3.R0

2.1.1 New Features, Major Improvements

Key	What's New
ADDS-22094	<p>Runnables, Client Server Ports</p> <p>A description can now be stored for Runnables, Client Server Ports and Client Server Interfaces.</p>
ADDS-22003	<p>SWC</p> <p>The dialogue for inserting data objects "Get Data Object from another Container / SW-Component" has been extended so that the interface objects can be inserted directly into the container. In addition, the SWC check has been improved.</p>

[2 issues](#)

2.1.2 Minor Improvements, Correction of Bugs

Key	What's New
ADDS-22393	<p>Project Check</p> <p>An error has been fixed which, under certain circumstances, led to an incorrect display of the data object version in project check 4.</p>
ADDS-22327	<p>Data Object - Max Refresh attribute</p> <p>If the setting "SupportAccessFrequencyAtDO" is set, ADD now behaves analogously to AccessFrequency when handling the MaxRefresh attribute.</p> <p>This means:</p> <ul style="list-style-type: none"> • DO specific storage • Overloading with Legacy CntValues • Writing Legacy CntValues
ADDS-22322	<p>ADD Offline-Sync</p> <p>If the isOwner feature is switched off, the isOwner attribute is now no longer written to the database, even though it is set in the DDX file.</p>
ADDS-22250	<p>Project Check</p> <p>Fixed a problem that caused the project check to not display errors for Basic Data Space elements that existed in a certain constellation and were inactive due to a code variant.</p>

Key	What's New
ADDS-22191	<p>Function Package</p> <p>When deleting a Function Package that served as the basis for the creation of new Function Package versions, an error message could occur - this problem has been fixed.</p>
ADDS-22178	<p>Conversion Version Check</p> <p>Fixed a problem that led to incorrect results in the Conversion Version Check due to an incorrect evaluation of code variants.</p>
ADDS-22173	<p>Container Display</p> <p>Due to errors in the evaluation of code variants on containers, there were some display errors in the UI, which have now been fixed.</p>
ADDS-22169	<p>ECU Management</p> <p>Fixed errors that occurred when creating the configuration of Sub-ECUs in the Sub ECU Management dialogue.</p>
ADDS-21937	<p>Project Compare</p> <p>Fixed a problem that caused differences in inactive Bus Outputs not to be displayed during ADD Project Compare.</p>
ADDS-19147	<p>VDM</p> <p>Fixed a problem that caused inactive signals (due to code variants) to be displayed.</p>
ADDS-17493	<p>History Feature</p> <p>Fixed a problem that caused an exception when loading/initialising the DB history tab (Java Control) and switching quickly between containers or loading the history content for a longer period of time.</p>
