1 ADD: Purpose and scope

This document describes the improvements and changes of the current ADD version compared to the previous versions.

2 ADD - What's new Info

2.1 Version 24.1.R0

2.1.1 New Features, Major Improvements

Key	What's New
ADDS-22536	<p>Container Responsible Handling</p> <p>When creating a new container version or a data object within a container, the Responsible is inherited from the container that serves as the basis for this under certain conditions. This functionality is switchable.</p>
ADDS-22483	<p>SWC</p> <p>An additional attribute for SWCs has been introduced which, in combination with the name and version, can be used to generate unique "Traceability Information".</p>
ADDS-22389	<p>VDM Performance</p> <p>General Performance enhancement.</p>
ADDS-22114	<p>SWC Check</p> <p>The error messages of the SWC check have been simplified/improved to make the check results easier to read.</p>
ADDS-22098	<p>SWC</p> <p>The ARXML import has been changed to create an Autosar artefact in which all information required for SWC development from the ARXML is bundled. Parameter SWCs removed; Composition SWCs deactivated per default.</p>

5 issues

2.1.2 Minor Improvements, Correction of Bugs

Key	What's New
ADDS-22707	<p>Function Package</p> <p>A bug has been fixed that prevented a copy of a Function Package from being created under certain circumstances.</p>
ADDS-22602	<p>VDM</p> <p>Fixed a bug where the overview could not be created when calling the VDM.</p>

Key	What's New
ADD-22579	<p>MDX Export</p> <p>Fixed a bug that caused the data object limits to be exported instead of the default limits for data objects when exporting MDX from the BusAdp.</p>
ADD-22547	<p>VDM</p> <p>A bug has been fixed that caused error messages to appear when opening certain projects.</p>
ADD-22465	<p>References Tab</p> <p>Fixed a problem that caused for a selected object in the "References" tab for Projects, Conf. Packages etc. to no longer display all newer versions of the object.</p>
ADD-22436	<p>Project Check</p> <p>An error has been fixed that caused entries for a DO occur multiple times or are not to be summarised during the project check 4.</p>
ADD-22428	<p>Open a Container context-specific</p> <p>If a container is opened in the context of another object, it can happen that overloaded attributes such as system constants can no longer be edited. The user is now informed via a tooltip why the attribute cannot be edited.</p>
ADD-22403	<p>ADD Sync mode</p> <p>Fixed a bug that caused the sync of StructInstances that used the same StructType once directly and once nested to abort with an error message on the second instance.</p>
ADD-22399	<p>Project Check</p> <p>An error has been fixed that caused Project Check 3 ("Output not used as Input") to display interfaces as open outputs, even though they are correctly connected to an input via the BusAdp.</p>
ADD-22387	<p>History</p> <p>Fixed a bug that caused only the newly created object to be displayed in the ADD history when using the "Clone and Replace" function in the container, but not the replaced object.</p>
ADD-22383	<p>Conversions</p> <p>Fixed a bug that caused a crash in ADD when renaming a conversion.</p>
ADD-22316	<p>MDX Export</p> <p>Fixed a bug that caused only the first SC to be correctly bracketed in the expression when exporting Dependent SCs via MDX.</p>
ADD-21119	<p>Checks</p> <p>A bug has been fixed where an optional check feature could not be used because other actions not relevant to the customer were linked to it.</p>
